<b>Office Action Summary</b>	<b>Application No.</b> 10/664,488	<b>Applicant(s)</b> WATANABE ET AL.	
	<b>Examiner</b> Tuan T. Dinh	<b>Art Unit</b> 2841	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

**Noted:** the term “capable of” performs a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison 69 USPQ 138.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Zappacosta (U.S. Patent 6,700,491).

As to claims 1, 10, Zappacosta discloses an electronic device (8, column 2, line 61) with a side face (a panel 10, column 2, line 60) as shown in figures 1-3 having a stepped portion to which a mountain-shaped angle member (22) is fixable, said stepped portion comprising:

a first wall portion (62) projecting outward from said side face,

a second wall portion (14) recessed inward from said first wall portion, and

a connecting portion (22, see figure 1) connecting said second and first wall portions (62, 14),

said electronic device (8) including a fixing member (screw 50), and said fixing member being a member for fixing said angle member (26) in a first attachment mode in which said angle member is in contact with said first wall portion and opposed to said connecting portion.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Chen (U.S. Patent 6,231,139).

As to claim 9, Chen discloses an angle member (104, see figure 1) fixable to an electronic device (102), said angle member comprising: first and second plates joined with each other at a bent portion, the first plate is longer than the second plate, and in a cross section perpendicular to an longitudinal direction thereof, a distance from an outer end portion of said first plate to said bent portion is longer than a distance from an outer end portion of said second plate to said bent portion, wherein said first plate is provided with a first fixing portion (hole 118) and said second plate is provided with a second fixing portion (116); and a distance from the outer end portion of said first plate to said first fixing portion is equal to a distance from said bent portion to said second fixing portion of the second plate.

***Allowable Subject Matter***

4. Claims 4-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior arts fail to teach, suggest, or in combination of the electronic device having said angle member comprises a first plate and a second plate joined with each other at a bent portion, and in a cross section perpendicular to an longitudinal direction thereof, a distance from an outer end portion of said first plate to said bent portion is longer than a distance from an outer end portion of said second plate to said bent portion; said first plate is provided with a first fixing portion for fixing to said side face; said second plate is provided with a second fixing portion for fixing to said side face; and a distance from the outer end portion of said first plate to said first fixing portion is equal to a distance from said bent portion to said second fixing portion of the second plate (claim 4).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 4-10 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen et al. discloses related art.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
